Round Pipes & Fittings

Rectangular Pipes & Fittings

Rainwater Heads

Half Round Gutters & Connections

The most popular domestic gutter system available in four nominal sizes: 100mm (4"), 115mm (4 1/2"), 125mm (5"), and 150mm (6"). The gutters connect to the round downpipes. Joints can be made using the gutter jointing kits on sizes 100-125mm, or alternatively using mastic.

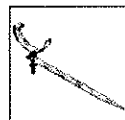

The 150mm diameter gutter has a large capacity - suitable for large roofs and commercial applications.
