With regards to the above application by Brett for an asphalt plant at Newhaven harbour, I wish to lodge my strong objection. I note that since I signed the petition against the plans Brett have modified these and responded to consultee's points. However my objections stand unaltered: This is a polluting, unsightly plant which will have a negative impact on the town; the whole bay; the traffic situation; tourism; the health of residents and the beach landscape. Any development should be further back from the coastline and be green and clean. The public money being spent on the road link is a disgrace in light of the lack of funds for other more beneficial projects.
