Comments

Reference: LW/799/CM(EIA)

Description: The construction and use of plant, namely aggregate processing plant, aggregate bagging plant, concrete batching plant, concrete block-making plant and buildings, ancillary offices and stores for processing and utilising aggregates landed at Newhaven Port and distribution of the products by road and rail together with access to the public highway and the extension of an existing rail siding.

Comments: As a local resident I object to the proposed build project. Newhaven already has one of the highest air pollution levels on the south coast. Expecting residents to accept yet more pollution, damaging their health and quality of life is unacceptable. The main south coast road is already at breaking point with congestion and adding additional heavy goods vehicles to the road daily will cause yet more pollution and congestion. The noise and light pollution from a factory operating constantly will also damage the health and wellbeing of locals living within the vicinity. While producing very few jobs for locals, the proposed site would also massively damage and spoil an area of natural beauty which both newhaven and seaford rely on for tourism revenue
