Subject: Proposed concrete factory at Tidemills

To whom it may concern

I know it is pointless writing this email as an objection never holds any weight, but I really feel I must try and do something.

When I heard about the development in the harbour I was stupid enough to think it was going to be an improvement to the area but when I heard what was going to be built there I really didn't believe it. There must be another alternative. Why can't the cement factory go where the old cement works was, outside Shoreham?

Newhaven has such potential as the gateway to the continent, sometimes the first sight of England a lot of tourists get. Like Dieppe it could be a truly lovely destination for a lot of visitors. **Why is it's potential not being tapped???**

Having dogs Tidemills is somewhere I take my dogs regularly especially when the tide is out and there's that wonderful expanse of sandy beach. To think that will all go fills me with despair.

I could go on about the environment and wildlife but I know I am wasting my time so all I can say is.

PLEASE PLEASE rethink this ridiculous and unpopular scheme and do something good for Newhaven for a change and stop using it as a dumping ground for undesirable factories that no one in Lewes want anywhere near them.

Regards

V. Manners
