### Comments

**Reference:** LW/799/CM(EIA)

**Description:** The construction and use of plant, namely aggregate processing plant, aggregate bagging plant, concrete batching plant, concrete block-making plant and buildings, ancillary offices and stores for processing and utilising aggregates landed at Newhaven Port and distribution of the products by road and rail together with access to the public highway and the extension of an existing rail siding.

**Comments:** I object to the proposal for the following reasons. The use of concrete is outdated and a waste of the earth's limited resources - there are ways to build which do not inflict such dirty options on to the lives of people and the environment in which they live. Those ways are being adopted all over the world by forward thinking Planning Departments! It can be done if the will is there to not just accept the easy option. It is time to make an effort to attract businesses to Newhaven which support the health and well-being of the people who live there and nearby towns and villages. This proposal flies in the face of all the work that has been done to improve the lives of residents over the last few years. Newhaven has already had its share of dirty industry. A balance in life is what counts. If your environment is not clean and sustainable EVERYONE suffers. How about looking at Newhaven as a whole with some imagination and seeing what's best for the whole town, rather than short term employment for very few people with serious repercussions for years to come for everyone? It will result in: Too much traffic, too much pollution, too much noise.
