ALDER WOOD MANAGEMENT: Cyclical coppicing of hornbeam and sweet chestnut within the wood to encourage regeneration of ground flora. Mature standards of sweet chestnut would not be coppiced. Taller mature hornbeams will be left as they are. A quarter of the coppicing will be carried out during the first year of construction (before completion), a quarter in year 5, and remaining quarters by ESCC in Year 10 and then year 15. ESCC would restart the cycle in Year 20. Review and selectively remove some of the holly during the first year of construction to provide more light for the ground flora within the wood. Annual monitoring and removal/control of alien invasive species. Inspect areas of bracken to determine the possible benefit or otherwise of bracken control, and if necessary carry out bracken control by an agreed method in Year 1 and Year 5.

BRICKYARD SHAW MANAGEMENT: Coppicing of hazel will be carried out during the first year of construction (before completion), a quarter in year 5, and remaining quarters by ESCC in Year 10 and then year 15. ESCC would restart the cycle in Year 20 and 40 etc. Possible selective clearance of one or two trees to provide more light to the pond in the middle of the wood. Annual monitoring and removal/control of alien invasive species.

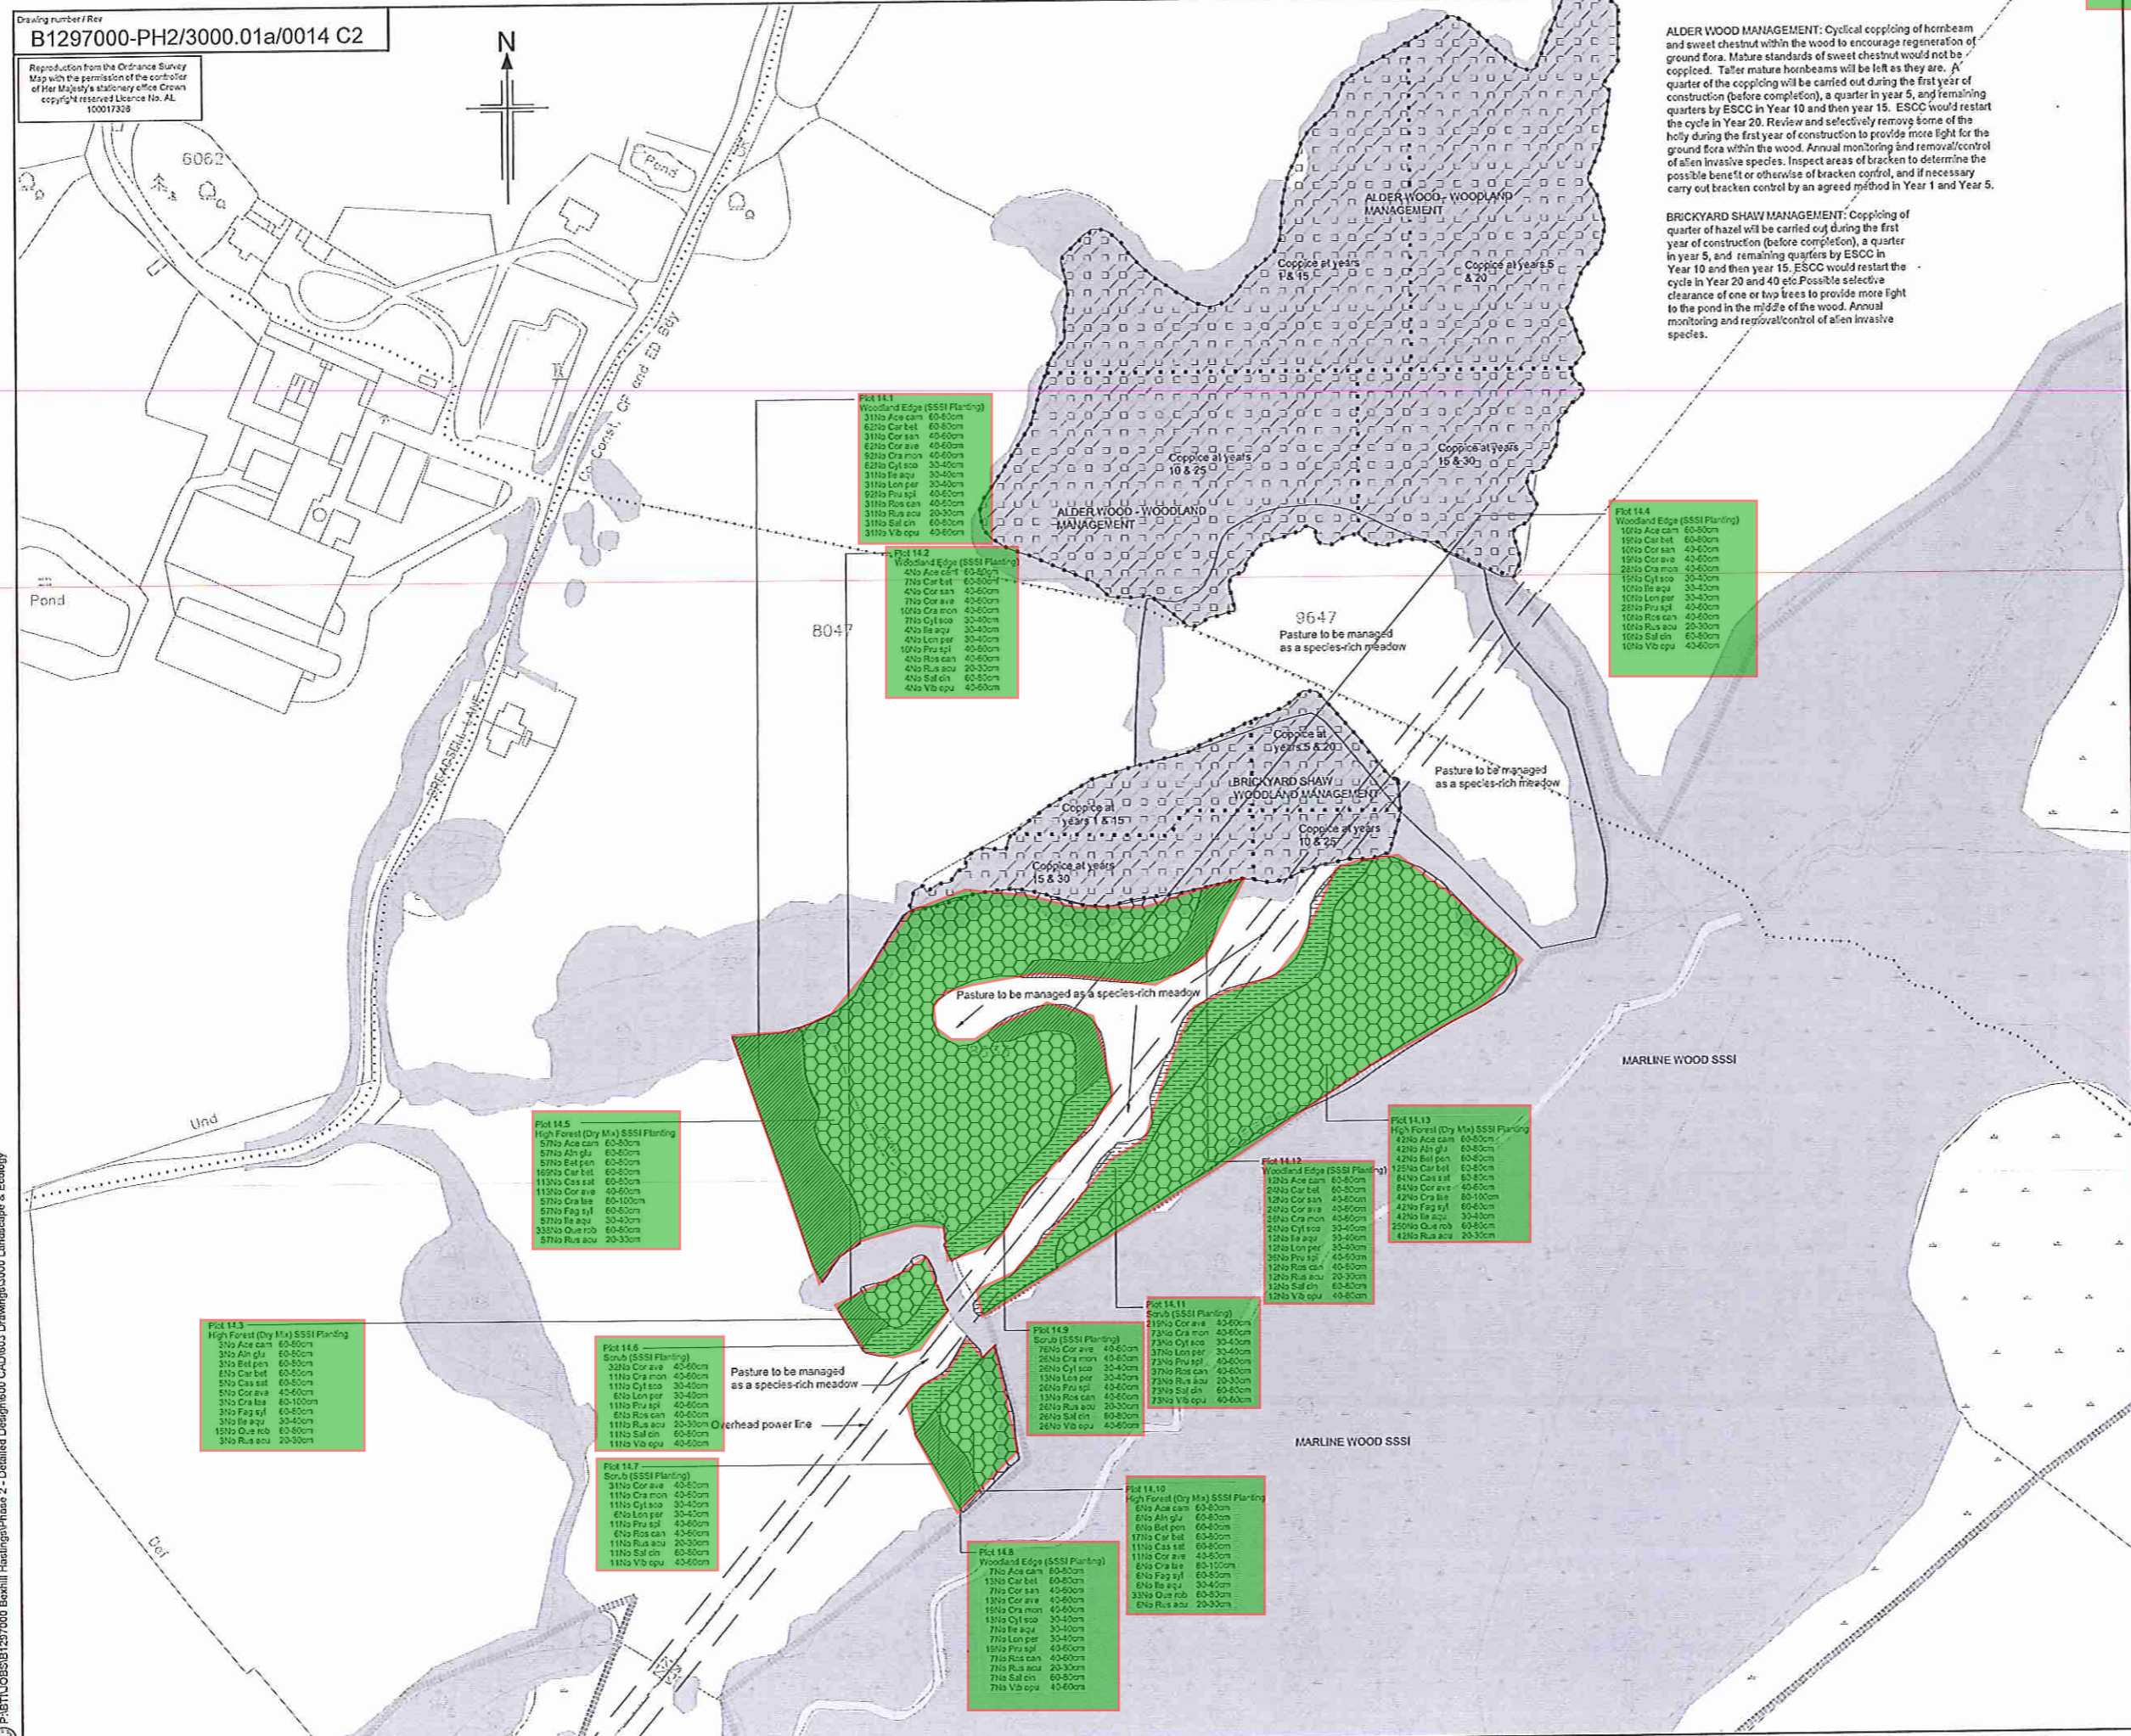

NOTES

1. All dimensions in metres unless otherwise stated.

KEY

- High Forest - Dry (Planting at average 2m centres, random mix in groups of 3-5 of each species, not to be planted in obvious or straight lines) (LE2.1 and LE2.4)
High Forest - Wet (Planting at average 2.5m centres, random mix in groups of 3-5 of each species, not to be planted in obvious or straight lines) (LE2.1 and LE2.4)
High Forest - Wet (Planting at average 2.5m centres, random mix in groups of 3-5 of each species, not to be planted in obvious or straight lines) (LE2.1 and LE2.4)
Woodland Edge planting at average 1.5m centres, random mix of 3-5 of each species. Care must be taken not to plant in obvious or straight lines (LE2.1 and LE2.4)
Scrub (Planting at average 1.5m spacing in a random mix in groups of 3-5 of each species, not to be planted in obvious or straight lines (LE2.3))
Existing Woodland to be managed (LE2.1)
Woodland management zones
Site of Special Scientific Interest (SSSI)
Watercourse
Pond
Existing trees, hedges & scrub to be retained
Public footpath
