

Dallington Primary School
Waste Minimisation statement

East Sussex County Council have asked us to provide a Waste Minimisation Statement in relation to the planning application at Dallington primary School for a proposed hard standing car parking area.

Due to the nature of this application, we will try to keep waste products as minimal as possible, the project incorporates only a small amount of construction works, therefore making waste a minimal problem.

The project will source as many recyclable products as possible. We will aim to use recycled chippings and hard core for the car park. We will also aim to use locally sourced materials for items such as the fence posts.

There is not an issue with packaging as much of the material is delivered on site by lorries.
