## Acoustic fencing & barriers that are built to last

*Buffalo Acoustic Fencing Barrier*

This system comprises of our unique timber 'tuning fork' design posts and 125mm boards featuring an interlocking "vee" coupled with a tongue and groove. This special profile has been carefully developed to locate the boards in such a way that eliminates gaps that sound will easily travel through, even then boards shrink and expand with changes in the weather. The fence is finished with a capping and counter rail.

The barrier can offer up to 28dB reduction in noise, is lightweight, easy to install and is able to be installed on uneven or sloping ground.

Buffalo Acoustic Fencing barrier certified laboratory results:

- Rating according to BS EN 1793 - 2:1998
- Category = B3
- Laboratory sound reduction 28 dB
- Superficial Mass 28kg/m<sup>2</sup>
