

Ref 3

## Waste Minimisation Statement

The project will require some ground works and the construction is in kit form erected by the contractor. There will be minimal waste and any waste generated by the project will be returned to the contractor for reuse or recycling.

Any excess soil for the ground works will be redistributed around the site to make up flower beds and infill grassed areas.

The redundant green house will be dismantled and given away to a member of the school staff.
